# Riya Jha

9711024310 connectwithriya23@gmail.com linkedin.com/RiyaJha github.com/RiyaJha

## Education

**Guru Gobind Singh Indraprastha University** 2023-2027
*Bachelor of Technology in Information Technology (GPA: 9.24/ 10.00)* *Delhi,India*

- Engineering student with hands-on experience in software development, Generative AI, and enterprise applications. Passionate about building practical solutions and exploring emerging technologies.

## Experience

**Pneumax Pneumatic India Pvt. Ltd.** Jun 2026 – Aug 2026
*SE Intern* *Greater Noida,UP*

- Worked on the company's internal Vendor Portal software to support vendor-related business workflows.
- Worked with vendor information modules including general information, specific information, warranty information, and vendor-submitted remarks.
- Supported software testing, debugging, and validation of vendor portal features.

**Defence Research and Development Organisation(DRDO) – SSPL** Feb 2026 – Apr2026
*Research Intern* *Delhi,India*

- Worked on predictive maintenance and reliability analysis of Power MOSFETs used in defense systems.
- Analyzed failure patterns and semiconductor device data to support reliability assessment.
- Explored failure-rate prediction under accelerated stress conditions.

**IGDTUW** Jun 2025 – Jul 2025
*Generative AI Intern* *Delhi,India*

- Worked with Generative AI and Large Language Models for practical automation use cases.
- Applied prompt optimization techniques to improve LLM output quality.
- Explored LLM-based automation workflows and AI-assisted solutions.

## Projects

**AI Scholarship Alert System** | *Python, n8n, LLMs, Telegram API*

- Built an AI-powered Telegram chatbot that delivers real-time scholarship alerts to users through automated workflows.
- Designed automated workflows using n8n for processing scholarship information and handling message delivery.
- Integrated LLM capabilities to generate intelligent responses and improve user interaction.

**RAG + Calculator Agent** | *Python, LangGraph, Claude, FAISS*

- Developed an AI application combining a calculator agent with knowledge-base search using LangGraph.
- Implemented retrieval-augmented generation using FAISS for searching and retrieving relevant information from a knowledge base.
- Integrated Claude as the LLM to process queries and generate context-aware responses.

**Invisible Cloak** | *Python, OpenCV, Computer Vision*

- Developed a real-time object masking application using color detection and background subtraction.
- Implemented computer vision techniques to detect and mask selected objects in real-time video frames.

## Technical Skills

**Languages**: Python, C++, JavaScript
**AI/ML**: Machine Learning, Generative AI, NumPy, Pandas, OpenCV, Prompt Engineering
**AI/Automation**: LangChain, LangGraph, n8n, LLMs, RAG, FAISS
**Web**:HTML, CSS, JavaScript,Angular, .netCore
**Databases Tools**: MySQL, Git, GitHub, VS Code, Jupyter Notebook,Google Colab
**Concepts**:Data Structures Algorithms, Artificial Intelligence, Machine Learning, Automation, Database Systems
